

19 Standard Network Cabinet

Overview

Our 19" network racks securely house your active and passive network components, such as fiber optic and copper cables, splice boxes, patch panels, routers, switches, servers and accessories. For industrial and outdoor environments, network cabinets, due to increased protection degrees e. IP54 or IP55, provide optimal. Portable 19-inch racks filled with audio processing outboard gear are a common sight at concerts with amplified sound. A 19-inch rack is a standardized frame or enclosure for mounting multiple electronic equipment modules. It holds different types of electronic IT. The standardized variant of the frame of a server cabinet has a width of 19 inches and a height of 10 to 42 HE. This not only protects your hardware but also facilitates maintenance and cable management.
