

200100 Cable Tray T-junction

Overview

Universal T-fitting for cable trays. Characteristic of this steel type is that - prior to mechanical deformation - it is given a zinc coating by means of a continuous dipping process. A cathodic action occurs on cut surfaces (up to 1.5mm) that protects against oxidation. Versatile connector that facilitates the creation of T-Joints and Crossover. Its design includes innovative splice components that can reduce the need for supports and brackets, enable fast, one person installation and lower overall costs. For both power and data cable applications, T&B® Cable Tray provides true performance for the long run. SFSP cable trays and accessories from SFSP are manufactured from steel sheets in accordance with BS EN 10130/BS EN 10131/ BS EN. Perforated cable tray with hinged cover, made of Sendzimir galvanized steel. The hinged system is composed of a standard C5 straight section, two hinges and a copper braid for equipotential connection.
