

380 Relay Protection Device Connection Method

Overview

Connect the three-phase power supply of 415V AC from the 3-P MCCB to the L1, L2, and L3 terminals of the Contactor, and then the 3-Phase motor (U1, V1 & W1) respectively (Motor as load is optional e. any kind of 3-phase load can be connected through the power circuit). Electrical installation – IEC 7. Electrical installation – North AmericaThe ABB ACS380 DC Drive is compatible with asynchronous AC induction motors, permanent magnet synchronous motors, and ABB synchronous reluctance motors (SynRM motors). For more information, see pages 27 and 48 of the manual. Was this helpful?
