

800G Active Optical Cable for Island Use

Overview

This cable is a 2x 400Gb/s twin-port OSFP (Octal Small Form-factor Pluggable) to 2x 400Gb/s twin-port OSFP active optical cable (AOC). It integrates eight high-speed electrical pairs, each supporting up to 100Gb/s with 100G-PAM4 modulation to deliver 800Gb/s links. The cable assembly meets OSFP 800G MSA and IEEE 802 3ck specifications. The signal integrity severely stressed under high-speed data transmission is enhanced via advanced ighest flexibility. The result is a highly flexible DAC cable which reduces the overall bend space up to. The 800G Active Optical Cable (AOC) series redefines data-center interconnect performance by combining the simplicity of a pluggable copper cable with the reach and signal integrity of embedded optics. Product is available in OSFP form to satisfy the different host system requirements.
