

ADSS optical cable and flame-retardant optical cable

Overview

Explore how to select the right fiber optic cable for challenging environments including high temperatures, extreme cold, salt spray, humidity, underground ducts, and direct burial. Learn about ADSS, OPGW, GYTA53, LSZH, and more—compliant with IEC, IEEE, UL, and RoHS. To verify US fire rating compliance for ADSS optical cables, confirm the cable's Outside Plant (OSP) classification, check for UL-listed markings on any indoor transition segments, request third-party test reports per NEC Article 770, and validate certifications directly through the UL Product iQ. With the advent of contemporary communication systems, optical cables have become the primary component used in the transmission, and receiving of data at a high speed. These effects on environment considerations and long-term durability directly affect the stability, service life, and maintenance. ADSS (All-dielectric Self-supporting) optical fibre cable is a type of self-supporting aerial fiber optic cable designed for aerial installation and deployment and is suitable for various outdoor applications. GL FIBER' fiber optic cable has a construction of optic fiber, loose tube or tight buffer. Performance standard for the supply of optical fiber cable in the industry. ARTIC ensures a stable quality control system for our cable R-1-FADPE-ZR-ADSS-100/200M-x 200 repeatedly specified by users without the cable diameter on wavelength rate process control ensures good mechanical and. Micro ADSS Optical Drop cable consists of individually colour coated 250um fibers, reinforced with aramid yarns as strength member and covered with UV and Flame resistant LSZH jacket or a thermoplastic urethane out sheath that offers excellent abrasion resistance and extreme cold temperature. ExactCables is a Pioneer Manufacturer with over 12 Years of Experience.
