

ATS High Low Beam Adjustment Module

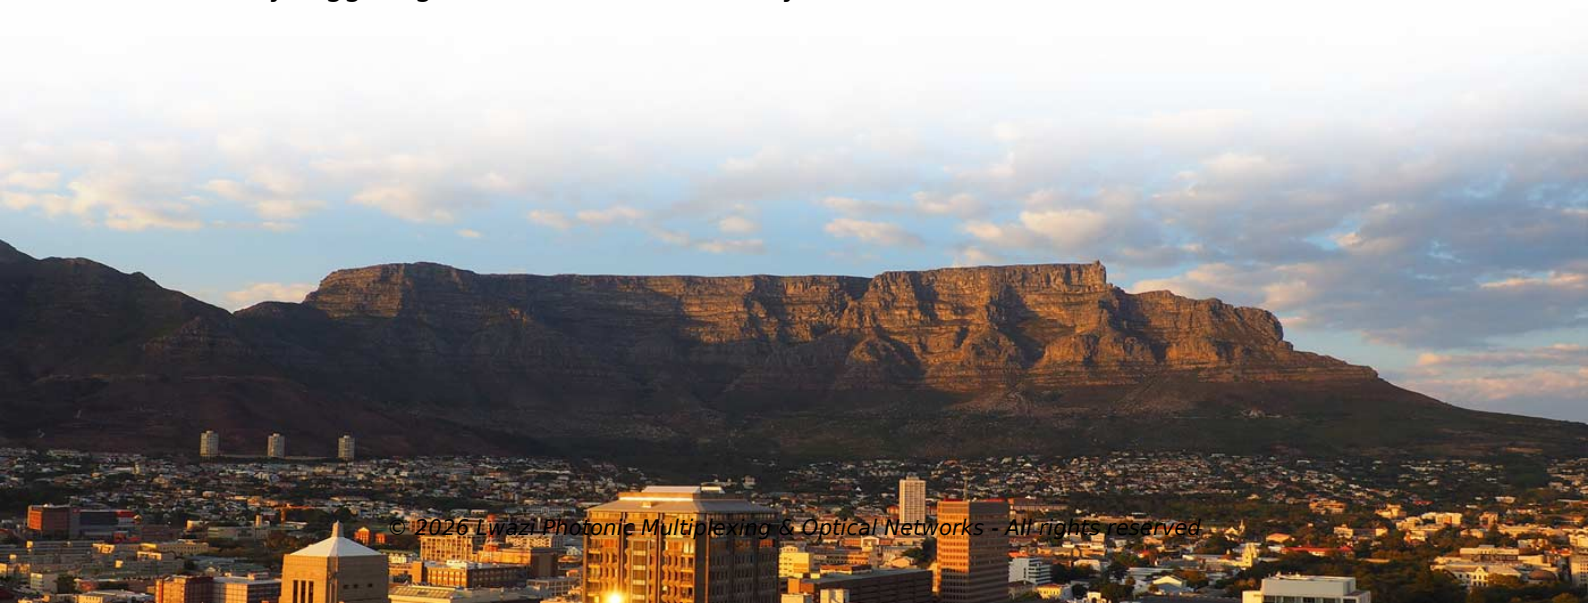

Overview

This mod widens low beams and lengthens high beams for all v1. (Selected mod trucks will come later.) You can also choose between Halogen and LED headlights at the Cascadia, Anthem, and 49X Truck Dealers. So, to use automatic high beam, first you have to set your light switch knob to AUTO -> and then you're allowed to use automatic high beam feature #3 by Reapercore » 04 Nov 2023 20:02 It's a. According to the newest update the headlights are supposed to be automatic, but it doesn't seem to work. I still have to turn the lights on/off manually. Not suitable for integrated graphics if you looking for better smooth screen rendering. Low Beam. Changed the color and range of the dipped beam. This content was uploaded by website. Is there a way to do a manual adjustment for the Dim lights on the SCS 389 Pete?

Hit F4 list lights no adjustment can figure out. What. What does the light adjustment menu do in ETS2?

It looks like this: I played around with the first four boxes but none of them changed what my toggle light command does on my controller.
