

Air-breaking frame with fully internal cable routing

Overview

These frames feature sleek, integrated cable pathways that keep your cables hidden within the frame, providing a cleaner look and reducing air resistance for improved aerodynamics. Whether you're racing on the road or taking on rugged trails, internal cable routing . In recent years, fully integrated cable routing has gained popularity, offering a sleek and aerodynamic solution previously reserved for carbon frames. While traditional steel frames have relied on external routing, modern fabrication techniques allow frame builders to integrate cables cleanly. Including a wide variety of component and wheelset options, Litespeed FI makes the clean lines and functionality of fully internal cable routing options more attainable than ever. No visible cables = more speed. and more fun. The Factor O2 and O2 VAM have a shared DNA and are built using the same carbon mould tool. Sleeving, stress risers, all that good stuff.
