

Armored GYTS Optical Cable

Overview

GYTS (Steel Tape Armored) is an outdoor loose tube fiber optic cable designed for harsh environments. It features corrugated steel tape (CST) armor for mechanical protection and a waterproof PE sheath, making it suitable for aerial, duct, and direct burial installations. The "GYTS" designation refers to its specific construction: an outdoor-use cable with a gel-filled loose tube (T) design, protected by a layer of corrugated. Outdoor GYTS Steel Tape Armored Fiber Optic Cable For Duct And Aerial GYTS supports core network, access network and FTTH system, mostly used in outdoor duct and aerial applications. Unlike GYTA (aluminum. UnitekFiber supplies OSP (Outside Plant) GYTS fiber cable. Central steel wire boosts overall strength, importantly. Water-blocking gel prevents any kind of moisture damage. Suitable for duct and direct buried application with fiber counts from 2cores to 432cores for both singlemode and multimode.
