

Burkina Faso Tubular Busbar Prices

AI Overview

Tubular busbars in Burkina Faso are primarily imported, with prices influenced by material type, size, and supplier, typically ranging from moderate to high due to import costs and limited local production.

Market Overview The busbar market in Burkina Faso has been growing rapidly, driven by infrastructure development and industrial expansion, with imports mainly from Turkey, Morocco, China, Ghana, and India. The market faces challenges such as high raw material costs, limited local manufacturing, and a shortage of skilled labor, which contribute to higher prices for busbars. Aluminum busbars are often preferred for their cost-effectiveness and heat dissipation properties, while copper busbars are used for high-current applications due to superior conductivity.

Types and Materials

Aluminum Tubular Busbars: Common alloys include 6063, 6061, 6351, and 2017, offering good electrical conductivity, corrosion resistance, and machinability. These are widely used in power distribution systems, substations, and electrical panels.

Copper Tubular Busbars: Used in high-current applications and substations, often paired with rigid, expansion, or tee connectors for 33kV, 66kV, and 132kV systems.

Pricing Considerations Exact prices vary depending on material, size, and supplier. Aluminum busbars are generally more affordable than copper, but imported products incur additional costs due to shipping and customs. For example, suppliers in Burkina Faso, such as those in Oubritenga, offer aluminum busbars sourced from India, which are priced competitively relative to local alternatives. Copper tubular busbars, especially for high-voltage substations, are typically more expensive due to material and fabrication costs.

Supplier Options

Local Distributors: Companies in Burkina Faso, such as those in Oubritenga, supply aluminum busbars and offer services like machining, forming, and plating.

International Suppliers: Alcomet and Signi Aluminium provide both copper and aluminum tubular busbars, including accessories and connectors for substations, wi...
