

Cable inlet sealing of distribution box

Overview

Cable entry points are often the weakest part of enclosure water ingress prevention. Outdoor and washdown enclosures need UV-resistant sealing, moisture control, and regular. The invention relates to the technical field of sealing of distribution boxes, in particular to a cable inlet sealing structure of a distribution box. The sealing structure comprises a main body and a support piece, wherein a through hole is formed in the center of the main body; the main body is. Outdoor power distribution box equipment operates in harsh year-round environments, prone to insulation aging, water ingress and short-circuit faults that jeopardize stable power supply. One area efficient Roxtec seal can replace up to 32 traditional cable glands. Technicians must enforce strict compliance when routing branch circuits through a waterproof distribution box. Adding protective sleeves and bundling cables correctly ensures system longevity and.
