

Cable tray installation in Syria

AI Overview

Cable tray systems in Syria are widely available through local manufacturers and suppliers, with established installation practices for industrial, commercial, and residential projects. Local Manufacturers and Suppliers Several companies in Syria provide high-quality cable tray solutions:

- APV Metal Cable Tray:** Established in Damascus in 1999, APV specializes in cable management systems, including trays, ladders, electrical panels, and underfloor boxes. They focus on high-quality, customizable solutions to meet local market demands.
- Syria Cables:** Founded in 1991, Syria Cables manufactures a wide range of electrical cables suitable for low to medium voltage applications, supporting industrial and commercial projects.
- Cable House:** Offers a comprehensive range of cable trays in Syria, emphasizing durability, reliability, and long operating life. They use advanced manufacturing technologies and graded raw materials to meet industry standards.
- Cable Tray Suppliers Syria:** Provides various cable tray products, including cable ladders, trunkings, and SS/GRP gratings, catering to different project requirements.

Installation Practices Proper cable tray installation is essential for safety, accessibility, and long-term performance. Key steps include:

- Material Inspection:** All trays, ladders, and accessories should be checked for damage and compliance with approved specifications before installation.
- Site Preparation:** Ensure the installation area is clean, with civil clearance completed. Mark horizontal and vertical routes according to approved shop drawings.
- Support and Hanging Systems:** Install supports at regular intervals to maintain tray alignment and allow for cable pulling and future maintenance. Clearance from other services must be maintained.
- Storage and Handling:** Cable trays should be stored horizontally on flat surfaces with timber supports, protected from moisture and sunlight until installation.
- Coordination:** Routes should be coordinated with other MEP services to avoid clashes, ensuring smooth cable management and accessibility for maintenance.
