

Cable trays and profiles

Overview

Cable trays are produced in different heights and widths to give more choice for loading space availability. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. They are typically made of metal, such as steel or aluminum, and are designed to provide a safe and efficient way to route and protect. These are very versatile assembly systems which allow complex assemblies to be carried out in a quick, easy, durable way. From heavy power cable pathways on oil drilling platforms to data center cabling, explore the cable tray that's strong yet.
