

Communication Tower Foundation Contract Price

Overview

Basic: Small monopole, single antenna, moderate site — Tower \$15,000; Foundation \$8,000; Installation \$12,000; Permits \$2,000; Total \$37,000–\$45,000; per-unit notes: \$/ft and \$/lb apply to materials. Cell tower build costs can vary significantly depending on the site location and terrain, as well as the type and height of the tower. Towers are not rooted by only pouring concrete—they require extensive soil analysis, wind loads, types of towers, and seismic activity to determine the necessary. The cost to build a tower varies widely based on height, material, location, and use. Typical projects range from modest steel monopoles to multi-story observation towers, with the main drivers being foundation work, structural steel, and permitting requirements. Cost estimates below reflect common U. You'll usually spend about \$250,000 to build a new cell tower, but total cost can range from roughly \$150,000 to more than.
