

Comoro Electrical Distribution Box Model and Dimensions

AI Overview

Comoro Electrical Distribution Boxes are available in various models, including portable 110V 80A boxes and low-voltage cabinets for industrial and utility applications, typically featuring IP54 protection and modular configurations.

Overview of Models

Portable Power Distribution Box (110V, 80A) Designed for construction sites, factories, and workshops in Comoros. Features a NEMA 5-20 power outlet and IP54-rated electrical breaker for dust and water protection. Wall-mountable and portable for flexible deployment. Suitable for temporary or semi-permanent installations where moderate current capacity is required.

Low-Voltage Distribution Cabinets ($\leq 1,000V$) Used in telecommunications, utilities, and industrial applications. Supports AC low-voltage systems, including solar PV grid-connected setups. Modular design allows integration of switchgear, transformers, and battery storage. Emphasis on load capacity, safety, and adaptability for outdoor or indoor installations.

Key Features

Protection Rating: IP54 for dust and water resistance in portable boxes; outdoor cabinets may have higher ratings depending on design.

Mounting Options: Wall-mounted, floor-standing, or integrated into larger enclosures.

Flexibility: Modular panels allow easy installation of MCBs, RCCBs, and other protection devices.

Construction: Typically made of durable metal or composite materials suitable for harsh environments.

Applications: Residential, commercial, industrial, and renewable energy systems.

Dimensions While exact dimensions vary by model and manufacturer, typical portable boxes (110V, 80A) are compact for portability, often around 30–50 cm in height, 20–40 cm in width, and 15–30 cm in depth. Low-voltage cabinets for industrial use are larger, with heights ranging from 1–2 meters, widths 0.5–1 meter, and depths 0.3–0.6 meters, depending on the num...
