

Direct supply from Brazilian DWDM optical cable manufacturer

AI Overview

Padtec, Wolon, and Cablena are leading Brazilian manufacturers offering DWDM optical cables and systems with direct supply options. Key Brazilian DWDM Manufacturers

Padtec is a major Brazilian DWDM specialist, providing complete optical transport systems for long-distance and high-capacity networks. Their solutions include DWDM transceivers, ROADMs, and monitoring features like OTDR for fault detection. Padtec is ideal for large carriers and projects requiring robust, high-performance networks, such as the 800 km DWDM network connecting Boa Vista and Manaus, implemented with InfoRR and 4WNet in Roraima and Amazonas states. They offer local support and can handle government or large-scale contracts. Wolon focuses on cost-effective optical transceivers and DWDM modules for day-to-day network expansion. They provide factory-direct supply, offering the same optical performance as premium brands at a fraction of the cost, making them suitable for ISPs and data center deployments where margin matters. Cablena do Brasil manufactures a wide range of optical cables, including aerial, direct-buried, and flame-retardant designs suitable for diverse environments across Latin America. They have experience in large-scale installations and can supply cables directly to clients for DWDM network projects.

Other Notable Suppliers

- Furukawa:** Known for high-quality optical cables and transceivers, suitable for public tenders and projects requiring brand reliability.
- Skylane Optics:** Offers compatibility-focused transceivers for heterogeneous networks, with on-demand coding in Brazil.
- Datacom:** Provides native integration with their OLTs and switches, ideal for Southern Brazil ISPs.

Considerations for Direct Supply

Project Scale: Padtec is best for long-haul, high-capacity networks, while Wolon and Cablena are more cost-effective for shorter link...
