

Distribution box concealed cover

AI Overview

Concealed distribution box covers provide secure, flush-mounted protection for electrical circuits while maintaining a clean, unobtrusive appearance. Key Features

Material and Construction: Concealed covers are typically made from flame-retardant ABS plastic, galvanized steel, or stainless steel, offering durability, corrosion resistance, and fire safety. Some models include transparent PC doors for easy monitoring of circuit breakers without opening the box.

Ingress Protection (IP) Rating: Choose a cover with an appropriate IP rating based on the environment. For indoor dry areas, IP40 is sufficient, while damp or outdoor areas require IP54 or IP65 for water and dust protection.

Size and Capacity: Covers are available in various sizes, accommodating 2–36 ways for circuit breakers. Ensure the internal dimensions allow for wiring space and future expansion.

Installation: Concealed covers are designed for flush-mounted or wall-embedded installation, saving space and providing a neat finish. Some models allow the DIN rail support panel to be hung outside the flush box for easier installation in narrow spaces.

Safety and Compliance: Look for UL, CE, CCC, or CQC certifications to ensure compliance with local electrical safety standards. Flame-retardant materials and shielding baffles enhance protection against electrical hazards.

Additional Features: Many concealed covers offer transparent doors that open up to 90°, easy access for maintenance, and compatibility with solar, generator, and grid systems. Some suppliers provide customizable sizes and configurations to match specific project requirements.

Applications Concealed distribution boxes are suitable for residential, commercial, and industrial settings, including homes, workshops, hotels, shopping malls, data centers, and solar power installations. They provide a space-saving, secure, and aesthetically pleasing solution for electrical distribution.

Supplier Considerations When selecting a supplier, consider experience, certifications, warranty, and customer fee...
