

Domestic relay protection experts

AI Overview

Power Relaying Solutions (PRS) and Schweitzer Engineering Laboratories (SEL) are leading domestic experts in relay protection, offering comprehensive services for utilities and industrial power systems. Key Domestic Experts Power Relaying Solutions (PRS) is a U.S.-based engineering services company specializing in protection, automation, and control solutions for electric utilities and industrial customers. PRS engineers are experts in applying and setting microprocessor-based protective relays for generation, transmission, distribution, and industrial power systems. Their services include relay settings, coordination studies, logic diagrams, operational descriptions, and documentation for both new and retrofit installations. PRS also provides automation and integration solutions, including substation HMIs, automation controllers, gateways, and network communications, as well as commissioning and testing using Doble and Omicron test sets. They offer customizable training for various audiences and locations, ensuring compliance with NERC standards and industry best practices. Schweitzer Engineering Laboratories (SEL) is a major U.S. manufacturer and provider of protective relays and related solutions. SEL relays cover a wide range of applications, including transmission lines, generators, transformers, busbars, feeders, motors, and capacitor banks. Their products feature advanced fault detection, high-speed protection, and digital substation solutions that reduce cabling and improve personnel safety. SEL also provides software tools for relay configuration, event analysis, and system visualization, supporting utilities and industrial operators in maintaining system stability and reliability. Additional Domestic Resources Other domestic companies and service providers, such as Powercom, offer full-service protective relay testing, calibration, maintenance, and repair. They specialize in monitoring current, voltage, frequency, and fault conditions, ensuring safe and reliable operation of protective devices across distribution and tr...
