

Double Distribution Box Lighting

Overview

It's ideal for use in hospitals and similar environments where an essential and non-essential supply is required for a group of luminaires. A circuit protective device at each. Use to control 2 groups of luminaires independently of each other (same circuit, separate control) or to control 2 individual circuits of luminaires (2 protective devices at the distribution board (s) - must be the same phase). Regardless of application, these Distribution Boxes support standard. Lucy Electric's range of low voltage outdoor cut outs and distribution boxes is engineered for durability, safety, and ease of installation in demanding environments. It is used for the structured distribution of electrical energy to different circuits within a building or a specific area, such as a lighting system. Note: F2U Box is not required for Control.
