

Fiber Optic Attenuator Price List

AI Overview

Fiber optic attenuators typically range from \$5 to \$150 per unit, depending on type, attenuation level, and connector style. Price Overview Fiber optic attenuators are available in fixed and variable types, with prices influenced by attenuation range, connector type, and manufacturer. Basic fixed attenuators for single-mode or multimode fibers with standard connectors (LC, SC, FC, ST) generally cost \$5–\$30 per unit for low to moderate attenuation levels (1–20 dB) when purchased from suppliers like DigiKey. Higher-precision or high-attenuation models (20–60 dB) can range from \$30–\$100. Variable optical attenuators (VOAs), which allow adjustable attenuation, are more expensive due to their mechanical or electronic control mechanisms. Prices typically start around \$50 and can exceed \$150 for high-precision or electrically controlled VOAs used in laboratory or WDM network applications.

Factors Affecting Price

Connector Type: Common connectors like LC, SC, and FC are generally less expensive, while specialty connectors or APC variants may increase cost.

Attenuation Range: Higher dB ratings or wide-range attenuators cost more due to precision requirements.

Material and Mechanism: Absorptive attenuators are simpler and cheaper, while reflective or MEMS-based VOAs are more costly.

Supplier and Region: Prices vary by supplier and country. For example, Indian suppliers on IndiaMART offer competitive pricing for bulk orders, while U.S. distributors like DigiKey provide ready-to-ship units with transparent pricing.

Supplier Options

DigiKey: Offers a wide range of in-stock fiber optic attenuators with pricing visible online and same-day shipping.

FS.com: Provides fixed and variable attenuators with attenuation ranges up to 60 dB, suitable for WDM systems.

IndiaMART: Lists multiple manufacturers and suppliers in India, allowing direct price inquiries for bulk or custom orders.
