

Fiber Optic Cable Sales Process and Prices

AI Overview

Fiber optic cable prices range from \$0.09 to \$6 per foot depending on type, strand count, and installation, while network cable costs vary by category and installation complexity.

Fiber Optic Cable Pricing

Material Costs: Retail prices for fiber optic cables typically range from \$1 to \$6 per foot, depending on fiber count, type, and construction, while wholesale bulk purchases can be as low as \$0.09 to \$1.52 per foot.

Fiber Type: Single-mode fiber is generally cheaper per foot (\$0.10–\$0.50) than multimode fiber (\$0.30–\$1.00), but single-mode requires more expensive equipment.

Strand Count: Higher strand counts increase costs proportionally. For example, a 12-strand cable costs around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot.

Construction & Rating: Indoor riser-rated cables are less expensive than plenum-rated cables. Armored cables for harsh environments or direct burial can range from \$0.50 to \$5 per foot.

Installation Costs: Labor, trenching, splicing, and termination can add \$0.60 to \$3.00 per foot, depending on terrain and complexity. A typical 1,000 ft indoor single-mode run may total \$2,650–\$3,100, while a 5,000 ft outdoor armored run can reach \$11,000–\$14,500.

Market Trends: Fiber prices have been rising in 2026 due to supply constraints, with rapid fluctuations possible, especially for high-demand fibers like G.652D and G.657.A1.

Network Cable Pricing

Copper Ethernet Cables: Cat5e, Cat6, and Cat6a cables typically range from \$0.10 to \$0.50 per foot for bulk purchases, with pre-terminated patch cables costing more depending on length and connector type.

Installation Considerations: Costs increase with the number of drops, conduit requirements, and labor. Commercial installations with 100–200 network drops can range from \$15,000 to \$30,000 including materials and labor.
