

Fireproof putty for power cable trays

Overview

3M™ Fire Barrier Moldable Putty Stix MP+ is a one-part, re-enterable, intumescent putty that can be easily formed to firestop through penetrations and blank openings in fire-rated assemblies. Formulated dark red, this easily moldable putty stick provides up to 4 hours of fire. The following charts give the number of 3M pillows needed to completely firestop an opening that cable tray passes through. UL Listed Systems Concrete Wall - C-AJ-4056 3 HR F-Rating, 3/4 HR T-Rating Gypsum. Fireproof putty is a critical passive fire protection material used in construction and industrial applications to seal openings around cables, pipes, ducts, and other penetrations. In case of fire, a blockade of fire-resistant filler is formed that restricts the passage of smoke and fire.
