

Function of wire mesh cable tray fasteners

Overview

Fasteners and connectors are essential components for assembling and installing wire mesh cable tray. Bolts, nuts, screws, and clips are commonly used fasteners. They are used to join different sections of the tray together, attach end fittings, and secure the tray to the support. Over 35 years ago, Cablofil invented the concept of wire cable tray and introduced it to the European market. Their open-mesh design enables excellent ventilation, which effectively dissipates heat generated by operating cables. At temperatures below - 20 °C, the material will be any other purpose than. Manage cables with an open overhead system that's designed to handle heavy loads, easy to install on the jobsite and a more flexible option than traditional conduit systems. Constructed from our dependable ladder tray components.
