

Galvanized perforated cable tray current price

AI Overview

Galvanized perforated cable trays typically cost between \$2 and \$25 per meter, depending on material, size, and galvanization method. Price Range and Factors The cost of galvanized perforated cable trays varies widely based on several factors:

- Material and Galvanization:** Pre-galvanized mild steel trays are generally more affordable, while hot-dip galvanized trays offer superior corrosion resistance and durability, which can increase the price.
- Tray Type and Size:** Perforated trays are usually cheaper than ladder-type trays and are available in widths from 120 mm to 1200 mm, heights from 50 mm to 160 mm, and standard lengths of 2.4 meters.
- Load Capacity and Application:** Trays designed for heavy-duty cable distribution or industrial environments may cost more due to higher strength requirements.
- Customization:** Custom sizes or OEM/ODM options can increase the overall cost.

Typical Costs Per Meter Pricing: Standard galvanized perforated trays range from \$2 to \$25 per meter, with bulk orders often reducing the unit cost.

Standard Lengths: Most trays are sold in 2.4-meter sections, so a single tray may cost proportionally based on the per-meter price.

Long-Term Value: Galvanized trays are low-maintenance and durable, providing cost savings over time compared to non-galvanized or stainless steel alternatives.

Additional Considerations

- Installation Costs:** Labor, supports, and accessories like dividers or covers can add to the total project cost.
- Environmental Factors:** Hot-dip galvanization is recommended for outdoor or corrosive environments, while pre-galvanized trays are suitable for indoor or less harsh conditions.
- Airflow and Ventilation:** Perforated trays allow better ventilation for cables, reducing overheating risks and improving safety.

In summary, for a standard pre-galvanized perforated cable tray, expect to pay around \$2-\$25 per meter, with...
