

How much does a prefabricated mesh cable tray cost in Portugal

AI Overview

Prefabricated wire mesh cable trays typically cost between \$10 and \$25 per meter, depending on material, coating, and supplier, with total installed costs influenced by labor and project complexity.

Price Range and Material Considerations

Wire mesh (basket) cable trays are among the most affordable and lightweight options for cable management, ideal for IT, control, and low-voltage installations. The base cost per meter generally ranges from \$10 to \$25, depending on:

- Material:** Pre-galvanized steel is cheapest, hot-dip galvanized (HDG) is more durable and slightly more expensive, aluminum is lightweight but pricier, and stainless steel is the most expensive.
- Coating:** HDG or powder-coated trays resist corrosion and increase longevity, which can raise upfront costs.
- Size and load capacity:** Larger trays or those designed for heavier cables cost more per meter.

Installation and Total Project Costs

While the tray itself may seem inexpensive, total project costs include:

- Labor:** Wire mesh trays are faster to install than ladder or perforated trays, reducing labor costs.
- Fittings and accessories:** Bends, tees, and supports add to the overall expense.
- Flexibility and scalability:** Wire mesh trays allow easy modifications and future expansions, potentially saving 40–60% of project costs compared to conduit systems.

Local Considerations for Portugal

In Portugal, prices may vary slightly due to shipping, import duties, and local labor rates. For bulk orders or large projects, suppliers often offer discounts, which can reduce the per-meter cost. It is advisable to request quotes from local distributors or suppliers such as RS Components or specialized cable tray manufacturers to get precise pricing.

Summary

Estimated cost per meter: \$10–\$25 (≈ €9–€23)

Cheapest option: Pre-galvanized steel

Durable option: Hot-dip galvanized or stainless steel

Installation advantage: Wire mesh trays are quick to ins...
