

Huawei PoE Switch 32

Overview

The S6720-32C-PWH-SI is a robust and future-proof choice for building scalable, secure, and reliable high-performance networks, especially those embracing multi-gigabit wired and wireless technologies with PoE capabilities. Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, governments, education, finance, and manufacturing. CloudEngine data center switches — Ethernet switches widely. Huawei's PoE (Power over Ethernet) switches solve this challenge by combining data and power transmission through a single cable - delivering smarter, greener, and easier network deployment. This document describes all the configuration commands of the device, including the command function. High-power PoE, multigigabit speed, and AI-driven operations for smart campuses, IoT corridors, and Wi-Fi 6/6E/7 edge networks. 3bt Type 3) and 90 W. Check each product page for other buying options. This state-of-the-art switch is specifically designed to meet the demands of modern businesses.
