

# Iceland Consulting 400G Aggregator Switch

## Overview

A compact 1U 400G switch built for AI clusters, storage fabrics, and high-speed aggregation, featuring four 400G QSFP56-DD ports, dual 10 Gigabit Ethernet, and RouterOS v7. 5 W) network interfaces in a 2RU compact design that can be deployed as a standalone router. The AGR560 is engineered with the Broadcom StrataDNX™ Jericho2c+ silicon. The IntellaView 400G EdgeSwitch integrates with your network architecture to provide simpler data management and reduce costs. With hot-swap power supplies, robust cooling, and low power consumption, it delivers ultra-high bandwidth, wire-speed. For the most demanding environments the 400G routing and switching platforms provide flexibility and choice for large scale cloud, leaf and spine, routing transformation and hyperscale IO intensive applications. Universal Leaf & Spine Modular Spine High Network Radix Fixed Leaf & Spine for High. Edgecore AGR560 is a high-capacity 10G SFP+, 100G QSFP28, 400G QSFP-DD switch designed for advanced service provider, aggregation, and transport environments that require flexible high-speed interfaces and scalable network performance.
