

Indonesia optical transmitter 200G

Overview

Q56QL002D00F is a high performance QSFP56 transceiver module for 200 Gigabit Ethernet data links over a single mode fibre pair. The four transmitters are CWDM lasers generating four optical 25GBd PAM4 output signals, which are multiplexed together at the. GND is the symbol for signal and supply (power) common for the QSFP56 module. All are common within the module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal common ground plane. VccRx, Vcc1 and VccTx are the. Ethernet, Data centers, Data center internal networks, enterprise, Campus networks, Metropolitan networks, 5G wireless networks and other telecommunication environments. Mouser offers inventory, pricing, & datasheets for Transmitter Modules Fibre Optic Transmitters, Receivers, Transceivers. Find out what's included and explore available upgrade options from Keysight.
