

Iran s fiber optic cable construction

Overview

WANA (Aug 09) – The CEO of the Telecommunication Company of Iran (TCI) has announced the launch of a national fiber optic mega project that will replace all copper cables in the country within five years, providing high-speed connections to 27 million subscribers. Speaking at a press conference on Saturday, Jafarpour said that with. Initiated by NEQSOL Holding and implemented through its subsidiary AzerTelecom, the Digital Silk Way is a large-scale digital infrastructure project designed to build a high-capacity transit fiber-optic network linking Europe with Central and South Asian markets / Digital Silkway The Trans-Caspian. Iran's electricity company Tavanir is planning to run fiber optic cables to the homes alongside its power network across the country as it seeks to install a new generation of electricity meters while enabling communication service providers to offer faster internet connections. Iran is spending more on a flagship project to provide optic fiber broadband to some 20 million customers across the country. Iran's Minister of Communications and.
