Market Overview

The Iraq data center market is projected to grow from USD 232.92 million in 2021 to USD 1,021.73 million by 2029, with a CAGR of 20.3%. This growth is driven by the increasing adoption of cloud computing, 5G networks, and digital services, which require secure, reliable, and low-latency data center infrastructure. Data centers in Iraq provide redundancy, high-speed connectivity, and disaster recovery capabilities, supporting both private enterprises and government operations.

Services and Capabilities

Iraq-based data centers typically offer:

- Colocation and cloud hosting for scalable IT infrastructure
- 24/7 technical support and monitoring to ensure uninterrupted operations
- Advanced security measures including fire suppression, w...
