

Is it okay to paint the base of a telecommunications tower

Overview

The FAA determines whether the antenna structure constitutes a potential hazard and may recommend appropriate painting and lighting for the structure. Any person. The Federal Aviation Administration (FAA) has established regulations and guidelines for tower painting to ensure the safety of air traffic. These requirements include specific color schemes and patterns to increase visibility and help prevent collisions with towers. FAA recommends that quality paint be used to maximize years of service. However, if a licensee or permittee authorized on an antenna structure is aware that the structure is not being. The FCC has been given the authority by Congress to require the painting and/or illumination of antenna towers when it determines that such towers may otherwise constitute a menace to air navigation. Our coating solutions for cell and grid towers maximise the lifetime of the treated surface by providing the best possible protection and excellent colour stability.
