

Maldives Solar Cable Tray Prices

AI Overview

Solar panel cable trays in the Maldives typically range from MVR 1,500 to MVR 5,000 per unit depending on material, size, and supplier. Local Suppliers and Options

Asters Maldives offers metal and aluminum cable trays in various sizes (e.g., 9'6") with bundled connectors and screws. Prices vary by model and material, and some items are available for pre-order with delivery expected in June. Brilltech Engineers Pvt. Ltd. is a leading manufacturer and supplier in the Maldives, providing both standard and customized electrical cable trays suitable for solar installations. They cater to industrial and commercial projects and can provide quotes based on specific requirements. BlueSea Hardware stocks a range of electrical hardware, including cable trays, at competitive prices. While exact solar-specific tray prices are not listed, contacting them directly can provide current pricing and availability. MP Husky specializes in solar cable trays designed for utility solar mounting applications. Their trays are made from galvanized steel, aluminum, or stainless steel, offering corrosion resistance and suitability for harsh environments. Prices depend on material, span length, and quantity, and inquiries are required for exact quotes.

Price Considerations

Material: Aluminum and stainless steel trays are more expensive than standard galvanized steel but offer better corrosion resistance in tropical climates.

Size and Span: Longer trays or those designed for large solar arrays cost more.

Bundled Accessories: Trays with connectors, screws, and mounting hardware may increase the unit price.

Local vs Imported: Imported trays (e.g., MP Husky) may include shipping and import duties, affecting the final cost. For accurate pricing, it is recommended to contact suppliers directly with your project specifications, including tray length, material preference, and quantity. This ensures you receive a tailored quote suitable for solar panel installations in the Maldives.
