

Modular Energy Storage Unit 10kW Manufacturer Export Price

AI Overview

A 10kW modular energy storage unit, such as those from Dinghui or EcoFlow, typically costs between \$7,000 and \$12,000 per unit for export, depending on specifications, modularity, and battery chemistry.

Manufacturers and Product Features

Dinghui is a leading OEM/ODM manufacturer of solar inverters, lithium iron phosphate (LiFePO₄) battery packs, and modular energy storage systems. Their 10kW modular units feature long life (over 6,500 cycles at 80% depth of discharge), built-in battery management systems (BMS), and compatibility with most hybrid inverters. The modular design allows easy capacity expansion and parallel connection, making it suitable for residential and commercial solar systems. Dinghui exports to over 100 countries and provides warranty support for the entire system.

EcoFlow offers the OCEAN Pro 10kWh LiFePO₄ modular battery, designed for residential solar and backup applications. It supports up to 8 batteries per inverter (up to 80kWh total), continuous 10kW discharge, IP67 waterproofing, and UL 9540A/B compliance. Advanced safety features include integrated fire suppression, thermal management, and rapid shutdown via the OCEAN Smart Panel.

Pricing and Export Considerations

The export price for a 10kW modular LiFePO₄ energy storage unit generally ranges from \$7,000 to \$12,000 per unit, depending on brand, warranty, and technical specifications. Premium modular systems with stackable design, high cycle life, and advanced BMS may be at the higher end of this range. For wholesale or bulk export, manufacturers like Dinghui typically provide quotations within 4 hours of inquiry, and prices can be negotiated based on order volume.

Key Technical Specifications to Consider

Battery Chemistry: LiFePO₄ for thermal stability and long cycle life

Nominal Voltage: Typically 48V for residential-commercial hybrid systems
