

Netlink Fiber Optic Transceiver Module

Overview

NETLINK SFP fiber optic transceiver working at 850/1310nm wavelength, could use with both multimode optical fiber and single mode optical fiber, it is small size transceiver with LC interface and it is hot swappable, easy to use, no need further configuration. The small form-factor pluggable (SFP) is also called Mini GBIC is a hot-pluggable transceiver used for both telecommunication and data communications applications. It interfaces a network device for a switch, router, media converter or similar device to a fiber optic or copper networking cable. And. How to order?

Oxygen-free copper core + full-scenario adaptability, building a solid network foundation in one stop. constructed from industrial-grade black metal, it supports multi-channel high-speed transmission and boasts exceptional stability Suitable for use in medium and large enterprises. 10/100/100M auto-adaptive Ethernet fiber optical transceiver, using the latest design, high-performance chips, high-quality optical transceiver module, stable function and excellent quality, adaptability, and common network equipment can normally connection.
