

Optical cable vibration damper fd

Overview

This series of vibration dampers is designed to protect overhead conductors and fiber optic cables from wind-induced vibrations. The Stockbridge Conductor Damper effectively dissipates energy generated by aeolian vibration, preventing fatigue and extending the lifespan of power lines. Made of weather-resistant, non-corrosive plastic, these dampers have a large, helically-formed damping. Clamp Type Vibration Damper for ADSS/OPGW cables, with tuning fork structure of Damper Weight, is validated by China Electric Power Research Institute that there are four frequency between 5~150HZ, and its vibration range is wider than FG Damper or FD Damper. Plenty Vibration Dampers have been. IEC describes the Stockbridge damper as a system consisting of a messenger cable with two masses at its ends and a clamp that supports them; this clamp is attached to the conductor or earthwire with the purpose of reduction of the aeolian vibration on the conductor. High-strength Materials - Made of.
