

Optical power meter EPV33TV10

Overview

This optical power meter is widely used in the construction, maintenance, inspection and acceptance of optical fiber communication network projects. A family of pocket-sized and low-cost optical power meter plus optical. Optical power meters and detectors have been served by Newport for over 30 years. Our 1936-R/2936-R series boasts state-of-the-art analog boards with a whopping 250. The S130C sensor features a sliding neutral density filter. Without the filter, the power measurement range is 500 pW to 5 mW, while with the filter, the range is 5 mW to 500 mW. The wide dynamic range in a single gain stage is ideal for optical alignment Versatile, general power meter with data logging capability The MPM-220 is a multi-port optical power meter that is perfect for measuring the optical characteristics of multi-port optical devices.
