

Portugal AI Server

Overview

Microsoft has announced a landmark investment of more than US \$10 billion to build a new artificial-intelligence-optimised data-centre complex near Sines, Portugal, as part of its global strategy to expand compute capacity and support large-scale AI workloads across Europe. High-Density GPU Computing Platforms, Specialized Deep Learning Clusters, and Tailored Enterprise AI Infrastructure for Portugal's Technological Transformation Deploy robust, high-availability architecture optimized for localized research, large-scale deep learning models, and complex AI pipeline. AIME is specialized in high-performance computing solutions tailored for artificial intelligence. From state-of-the-art HPC servers and workstations to a powerful AI cloud, we provide scalable, reliable, and efficient infrastructure for deep learning and high-performance computing needs. The Portugal facility. Portugal is gaining traction as a promising center for AI development in Europe, supported by a robust tech startup culture, growing investment from public and private sectors, and strategic government-led initiatives. The new facility, to be built along.
