

Price of Multimode Optical Composite Cable

AI Overview

Multimode optical composite cables typically range from \$2.50 to \$13.50 per foot, depending on fiber type, construction, and specialized features. Pricing Overview The cost of multimode fiber optic cables varies significantly based on fiber type, fiber count, jacket rating, and whether the cable is armored or specialized. Standard pricing ranges are: OM1 Multimode: \$2.50 to \$4.00 per foot for riser or plenum-rated cables, suitable for short-distance applications. OM3 Multimode: \$3.28 to \$4.50 per foot, offering higher performance over longer distances, with riser and plenum-rated options affecting the price. OM4 Multimode: \$4.50 to \$5.50 per foot for standard ratings; specialized or armored versions can reach up to \$13.50 per foot. Composite or hybrid cables, which integrate voice, data, video, and power, are priced per meter and generally become cheaper per unit with longer lengths. For example, a 4-fiber multimode with 2-wire composite cable is available as OFNR riser-rated, with pricing decreasing as the order length increases. Factors Affecting Price Fiber Type: Higher-grade fibers like OM4 provide better bandwidth and longer reach, increasing cost. Fiber Count: More fibers per cable increase material and manufacturing costs. Jacket Rating: Plenum-rated or LSZH (Low Smoke Zero Halogen) jackets for safety in enclosed spaces are more expensive than standard riser-rated jackets. Special Features: Armored cables, bend-insensitive fibers, or cables designed for medical or industrial environments can significantly increase the price. Length: Pricing is typically per meter or per foot; bulk orders reduce the per-unit cost. Practical Considerations When budgeting for multimode optical composite cables, consider project requirements such as distance, environment, and data rate. For instance, OM3 may suffice for short campus runs, while OM4 is preferred for high-sp...
