

Price of Sealed Cable Tray Sleeves

AI Overview

Cable tray sleeves typically range from \$0.80 to \$34 per unit, depending on material, size, and purchase volume.

Price Range

Retail (B2C): Individual cable sleeves sold online, such as on Amazon, generally cost \$15 to \$34 per piece, with smaller or simpler sleeves sometimes available for less.

Wholesale/Bulk (B2B): Industrial or professional-grade sleeves can range from \$0.80 to over \$76 per unit, depending on material, durability, and quantity purchased. Bulk purchases often reduce per-unit cost significantly.

Material and Type Influence

PET (Polyethylene Terephthalate): Lightweight, flexible, and expandable; suitable for general cable bundling.

Nylon: Strong and abrasion-resistant; ideal for rugged environments.

Braided Sleeving: Provides good mechanical protection and flexibility; expandable for various cable sizes.

Silicone: Heat-resistant and moisture-proof; used in industrial and automotive applications.

Metal Mesh (Stainless Steel): Offers maximum protection against mechanical damage; used in heavy-duty or extreme conditions.

Factors Affecting Price

Material quality: Higher durability and heat or chemical resistance increase cost.

Sleeve diameter and length: Larger or longer sleeves cost more.

Brand and certifications: Reputable brands or compliance with industrial standards can raise prices.

Purchase volume: Bulk orders reduce per-unit cost, especially for B2B buyers.

Installation complexity: Sleeves with specialized features like expandable or heat-shrink designs may be priced higher.

In summary, for standard cable tray sleeves, expect to pay around \$15–\$34 per unit for retail purchases, while industrial bulk orders can be as low as \$0.80 per sleeve, with premium materials or specialized designs costing significantly more.
