

Price of Shibing Ladder-Type Cable Trays

AI Overview

Ladder-type cable trays typically range from \$20 to \$150 per meter depending on material, size, and finish. Ladder-type cable trays are widely used in industrial and commercial applications due to their open design, which allows easy access for maintenance and inspection of cables. Prices vary significantly based on the material:

- Stainless Steel:** Offers high strength and corrosion resistance, suitable for outdoor or corrosive environments. These trays are generally at the higher end of the price range due to durability and aesthetic finish.
- Hot-Dip Galvanized Steel:** Provides corrosion resistance with a zinc coating while maintaining tensile strength, ideal for industrial, agricultural, or outdoor use. Prices are moderate and depend on thickness and coating quality.
- Aluminum:** Lightweight and corrosion-resistant, aluminum trays are easier to handle and install, often priced lower than stainless steel but higher than basic galvanized steel for similar dimensions. The price per meter can also depend on the tray width, rung spacing, and load capacity. For example, wider trays supporting heavier cables or longer spans may cost more.

Additional accessories like elbows, tees, and covers can increase the overall system cost. Applications: Ladder trays are commonly used in manufacturing plants, oil and gas facilities, food processing industries, data centers, and telecommunications. Their open design ensures ventilation, preventing overheating of cables, and allows for easy modifications or expansions of cable systems. For precise pricing, suppliers like Alibaba, McMaster-Carr, and Grainger provide detailed listings with options for different materials, sizes, and finishes. Bulk orders or custom dimensions may also affect the final cost.
