

Price of Universal Rack-Mounted Fiber Optic Terminal Box

AI Overview

The price of a universal rack-mounted fiber optic terminal box varies widely depending on size, port density, and manufacturer, typically ranging from \$50 to several hundred dollars per unit.

Overview Rack-mounted fiber optic terminal boxes, also known as fiber patch panels or termination boxes, are designed to organize, protect, and manage fiber optic connections in data centers, telecom rooms, or network racks. They are available in 1U, 2U, and 4U sizes and support 12 to 96 ports, depending on the model and intended application. These enclosures are compatible with standard 19-inch or 23-inch racks and often feature sliding trays, push-pull drawers, or swing-out panels for easy access to fiber connections.

Key Features

- Material and Build:** Lightweight aluminum or steel construction for durability and corrosion resistance.
- Port Density:** Options range from 12, 24, 48, up to 96 ports, supporting SC, LC, or MTP connectors.
- Installation Flexibility:** Can be mounted in racks, on walls, or poles, suitable for indoor and outdoor use.
- Cable Management:** Includes splicing trays, storage space, and routing guides to prevent fiber damage.
- Compatibility:** Works with LGX modules, MTP HD distribution boxes, and other fiber management systems.

Pricing Considerations The cost depends on several factors:

- Size and Port Count:** Higher port density and larger U sizes increase the price.
- Material Quality:** Aluminum boxes are lighter and easier to handle, while steel boxes may offer more durability.
- Brand and Certification:** ISO9001, CE, or UL-certified products may cost more but ensure reliability.
- Customization:** Custom-length fiber cables, specialized connectors, or modular configurations can raise the price.

Typical market prices for standard 1U to 2U rack-mounted fiber optic terminal boxes range from \$50 to \$300, while high-density 4U or specialized models can exceed \$500 per...
