

Price of Welded Cable Tray Fixing Bracket

AI Overview

Cable tray welding fixing brackets typically range from \$2 to \$15 per piece depending on material, size, and coating. Overview of Brackets Cable tray welding fixing brackets are used to secure cable trays to walls, ceilings, or other structures, ensuring stability and compliance with standards like EN 61537. They are available in various materials such as galvanized steel, stainless steel, or electro-zinc coated steel, which affects both durability and price. Brackets can support light, medium, or heavy-duty loads, and some are designed for flexible installation with single or paired mounting options. Price Factors Material and Coating: Hot-dip galvanized or stainless steel brackets are more expensive than standard zinc-plated versions due to corrosion resistance and longevity. Size and Load Capacity: Larger brackets or those designed for heavy-duty industrial trays cost more. Small wall-mount brackets for light-duty trays are at the lower end of the price range. Supplier and Quantity: Wholesale or bulk orders from manufacturers, especially from China, can reduce the per-unit cost significantly. Retail or UK-based suppliers may charge higher prices for single units or small orders. Special Features: Adjustable or flexible brackets, or those compatible with multiple tray types, may carry a premium. Typical Price Ranges Light-duty brackets: \$2–\$5 per piece Medium-duty brackets: \$5–\$10 per piece Heavy-duty or stainless steel brackets: \$10–\$15 per piece Bulk or OEM orders: Prices can drop below \$2 per piece depending on quantity and supplier. Where to Buy Online suppliers: Ekabel24, RS Online, McMaster-Carr, and DirectChannel UK offer a range of brackets with delivery options. Wholesale manufacturers: China-based suppliers provide competitive pricing for bulk orders and OEM customization. Local distributors: Electrical wholesalers often stock standard brackets and can provide trade pricing for larger projects. Recommendations Check compatibility with your cable tray type (ladder, ventilated, or solid-bottom). Consider corrosion resistance if used outdoors...
