

Price of ceramic insert flip-top display plate

AI Overview

The price of ceramic insert flip-top display plates typically ranges from \$50 to \$300 per unit, depending on size, customization, and supplier. Pricing Overview Alibaba and wholesale suppliers offer ceramic tile flip displays with customizable shelves, hooks, and designs. Prices vary based on size, material quality, and order volume, with larger or fully customized units costing more. eBay listings for ceramic inserts show a wide range of prices, often starting around \$50 for standard inserts and increasing for specialty or high-quality designs. Etsy and handmade options provide unique or custom ceramic display plates, with prices typically ranging from \$60 to \$150 per plate, depending on craftsmanship and design complexity. Factors Affecting Price Material and Build Quality: High-grade ceramic, reinforced inserts, and durable flip mechanisms increase cost. Customization: Custom sizes, colors, or branding can significantly raise the price, especially for bulk orders. Order Volume: Wholesale or bulk purchases often reduce the per-unit cost, while single-unit purchases are more expensive. Shipping and Handling: Fragile ceramic items may incur higher shipping fees, particularly for international orders. Recommendations For commercial use, consider contacting suppliers on Alibaba or specialized display manufacturers to request a custom quote based on your required dimensions and features. For smaller or decorative purposes, platforms like eBay or Etsy provide ready-made options with transparent pricing and shipping details. Always check supplier reviews and ratings to ensure quality and reliability, especially for bulk or customized orders. By considering these factors, you can select a ceramic insert flip-top display plate that fits both your budget and display needs.
