

Price of internal threaded elbows for cable tray processing

AI Overview

Internal threaded elbows for cable trays typically range from \$1.3 to \$10 or more per piece, depending on material, size, and supplier.

Pricing Overview

Bulk industrial elbows: On platforms like Alibaba, standard cable tray elbows are available in galvanized or stainless steel for approximately \$1.3 per piece when purchased in bulk.

Specialized threaded elbows: Suppliers like McMaster-Carr offer over 9,000 threaded elbow options, with prices varying based on thread type, pipe size, and material. These can range from a few dollars to higher-end industrial fittings.

Custom or heavy-duty options: Manufacturers such as JLH Electric and Kam Tai provide custom-fabricated elbows in materials like galvanized steel, stainless steel, aluminum, or FRP. Pricing for these is typically quoted per project and depends on size, finish, and quantity.

Factors Affecting Price

Material: Stainless steel and FRP are generally more expensive than galvanized steel.

Size and Thread Type: Larger diameters and specialized thread standards increase cost.

Finish: Hot-dip galvanizing, epoxy coating, or polished finishes can add to the price.

Quantity: Bulk orders reduce per-piece cost, while small orders or custom designs are more expensive.

Supplier Location: Domestic suppliers may charge more than overseas manufacturers due to shipping and import costs.

Sourcing Tips

Compare suppliers: Alibaba and Made-in-China offer competitive bulk pricing, while McMaster-Carr provides fast delivery and standardized quality.

Request quotes for custom sizes: For non-standard cable tray systems, contact manufacturers like JLH Electric or Kam Tai for tailored pricing.

Check material compatibility: Ensure the elbow material matches your cable tray system to prevent corrosion or mechanical failure.

By considering these factors, you can estimate that standard internal threaded elbows for cable trays cost roughly \$1.3–\$10 per piece,...
