

Price of optical fiber cable connectors

AI Overview

Simple fiber optic cable connectors can cost as little as €3 (\$3-\$5) per unit, depending on type and supplier.

General Pricing Overview The cost of a fiber optic connector varies based on connector type, mode (single-mode or multi-mode), and whether it is sold individually or as part of a kit. Basic connectors, such as SC, LC, or FC types, are widely available and can be purchased for around €3 to \$5 per piece for standard single connectors. For more specialized connectors or kits, prices can increase. For example, FC/PC and FC/APC connector kits for single-mode or multi-mode fibers may cost more due to additional components like ferrules, crimping options, and mechanical keys. Retailers like Mouser and DigiKey provide pricing that depends on quantity purchased, with bulk orders often reducing the per-unit cost.

Factors Affecting Price

- Connector Type:** SC, LC, FC, ST, MPO, and others have different manufacturing costs and performance specifications.
- Fiber Mode:** Single-mode connectors are generally slightly more expensive than multi-mode due to tighter tolerances.
- Kits vs. Individual Connectors:** Kits with tools and multiple connectors cost more than single connectors.
- Quantity:** Ordering in bulk can significantly reduce the per-unit price.
- Supplier and Shipping:** Prices vary by supplier and may include tariffs or shipping fees, especially for international orders.

Example Pricing

- Single SC or LC connector: €3-€5 per unit from European suppliers.
- FC/PC or FC/APC connector kits: Prices vary depending on configuration, typically higher than individual connectors, often \$10-\$20 per kit.
- High-density or specialized connectors: MPO or MT-RJ connectors may cost \$15-\$50 per unit depending on specifications.

In summary, for a simple, standard optical fiber connector, you can expect to pay around \$3-\$5 per piece, with prices increasing for kits, specialized types, or bulk orders.
