

Prices of bundled and ribbon pigtails

AI Overview

Pricing for bundled and ribbon fiber optic pigtails varies widely depending on fiber type, connector type, and fiber count, typically requiring vendor quotes for exact costs.

Overview of Bundled and Ribbon Pigtails

Bundled pigtails consist of multiple individual fibers grouped together, each with a connector on one end and exposed fiber on the other. They are commonly used in industrial projects and smaller-scale installations where multiple fibers need to be spliced simultaneously. **Ribbon pigtails** are flat, multi-fiber assemblies where 2, 4, or 8 fibers are arranged in a ribbon configuration, with connectors mounted at one end. They are widely used in large-scale telecommunications, mobile networks, and data centers due to their efficiency in high-density splicing and space-saving design. Ribbon pigtails often come with protective tubes to ensure durability and ease of handling.

Factors Affecting Pricing

- Fiber Type:** Single-mode fibers (G.657A1/A2 or G.652D) generally cost more than multimode fibers (OM1-OM5) due to longer transmission distances and lower attenuation.
- Connector Type:** LC, SC, ST, FC, and LSH connectors vary in cost, with APC variants typically priced higher than standard UPC connectors.
- Fiber Count:** Ribbon pigtails with more fibers (e.g., 8-fiber vs 2-fiber) are more expensive due to increased material and assembly complexity.
- Customization:** Custom lengths, color-coded bundles, or pre-terminated assemblies can increase the price compared to standard stock items.
- Vendor and Region:** Prices vary by supplier and geographic location, with bulk orders often receiving discounts.

Typical Price Ranges

While exact prices fluctuate, bundled pigtails for single-mode fibers generally range from \$2 to \$10 per fiber depending on connector type and length. Ribbon pigtails with 4-8 fibers can range from \$10 to \$50 per assembly, with higher counts or specialized connectors increasing the cost. For precise pricing, contacting suppliers like FS, Netceed, Hexatronic, or EFB-Elektronik is recommended.
