

Raisecom Fiber Optic Access Method

Overview

Raisecom offers both Active Ethernet (AON - Active Optical Networks) and passive optical network (PON - Passive Optical Networks) access and aggregation solutions for high-density metro residential access. Introduction RC801/803/805-120B series fiber-optic multiplexers are ideal fiber-optic transmission devices for point-to-point networks, medium-sized and small capacity networks, such as wireless communication base stations, private communication networks, and switches organizing networks. The. Below you will find brief information for Fiber-Optic Multiplexer RC801/803/805-480B 16E1 Fiber-Optic Multiplexer. 35 signals and transparent E1 data line on fiber. The RCMS2504-120B provides 4 E1 links. The list of Raisecom product devices contains 25 user manuals and guides for 16 models in 11 type of devices © 2020, manymanuals.
