

Selection of Huijue Complete Distribution Boxes

AI Overview

Huijue offers a wide range of complete distribution boxes, including fiber optic, outdoor, and energy storage cabinets, designed for secure, weatherproof, and efficient deployment in telecom, industrial, and residential applications.

Types of Huijue Distribution Boxes

- 1. Fiber Optic Distribution Boxes** Huijue produces optical fiber distribution boxes suitable for 8-core to 48-core networks, made from materials such as SMC, metal, and plastic. These boxes are ideal for optical fiber access networks, providing secure housing for jumperless optical cross-connects, cable terminations, and joint closures. They support both indoor and outdoor installations and can be customized for specific network requirements.
- 2. Outdoor Enclosure Cabinets** These cabinets are designed for harsh environmental conditions, offering weatherproof, dustproof, and corrosion-resistant protection. They are available in IP54, IP55, and IP65 ratings and can house controllers, batteries, power distribution units, and network devices. Material options include galvanized or stainless steel, aluminum alloy, and composite panels with UV-resistant coatings. Mounting flexibility allows for pole-mounted, wall-mounted, or floor-mounted installations.
- 3. Energy Storage Cabinets** Huijue's energy storage cabinets integrate lithium batteries and intelligent energy management systems for industrial, commercial, and residential applications. They provide reliable backup power for telecom base stations, off-grid sites, and home energy storage, with scalable power ranging from 5kW to 20kW. These cabinets feature modular designs, thermal management systems, and real-time monitoring for optimized energy usage.

Key Features to Consider

- Ingress Protection:** Choose IP rating based on environmental exposure (IP54-IP65).
- Material and Durability:** Options include stainless steel, aluminum alloy, and composite panels.
