

Self-operated Huijue Fiber Optic Distribution Frame

Overview

Equipped with LC/UPC adapters, the ODF supports up to 96 fiber cores, delivering low insertion loss and consistent performance for short- and medium-distance optical links commonly used in access and transmission networks. In fact, the fiber optic industry is developing so fast that. Company Introduction: Established in 2001, Shanghai Huijue Network Communication Equipment Co., Ltd (HJ Network for short) is the leading manufacturer and solution provider for telecom and communication products. The headquarter of HJ Network including the R&D center, technical center, prototype. Fiber Optic Distribution Frame (or shortened as ODF), is used to form and distribute the local backbone optical cable in the optical fiber communication system, to fit the requirements of the connection, distribution and dispatch of the optical fiber line easily. They are useful device in fiber optic cable management.

Data center main distribution frame

Set up high-density fiber-optic cabling with low maintenance needs Build a simple, attractive and expandable main distribution frame with a small footprint, high-density cabling and zero maintenance

Optical Fiber Distribution Frame

ODF optical fiber distribution frame is flexible in configuration, easy to install and use, easy to maintain, and easy to manage. It is an essential equipment for

Fiber distribution frame classification

What are the classifications of optical fiber distribution frames? Fiber optic distribution frames are connected to fiber optic connectors. In integrated cabling, fiber distribution frames appear

Floor-mounted Fibre Optic Distribution Frame Q-Fiber

Floor-mounted Fiber Optic Distribution Frame Q-Fiber consists of the box and distribution board. The installation of a drawer (DS) makes it possible to extend the ODF to an extendable version.
