

Simple Tee for Prefabricated Cable Trays

Overview

Standard cable tray fitting fabricated using stainless steel (SS) angle plates and bolt sets. Available for purchase in a full composite system. Cable tray tees help split cable tray routes into branch directions while keeping the cable. To facilitate easy installation of cable trays we also manufacture accessories e. Vertical bend, horizontal bend, cross and horizontal tee. Our Perforated Type Cable Trays are used extensively in Buildings. A perforated tee is a cable tray fitting used to create a branch connection between three sections of a cable tray, allowing cables to be routed in two directions from a single point. When ordering state widths $W1 \times W2 \times W3$. Pre-galvanized steel fitting 3-5/8 inches side rail height 30 inches x 12 inches width solid trough horizontal reducing tee 12 inches radius Made or assembled in Canada. Equal tees, unequal tees and crossovers are available for light, medium and heavy duty cable tray systems with widths ranging from 50mm – 900mm.
