

Socket distribution box and wire prices

AI Overview

The cost of socket wires for a distribution box installation typically ranges from \$1 to \$5 per foot for standard residential wiring, with total material costs depending on wire length, gauge, and type. Wire Types and Pricing Standard 14/2 or 12/2 NM-B (Romex) wire for 120V circuits usually costs \$1–\$2 per foot for 14-gauge and \$1.50–\$3 per foot for 12-gauge wire, suitable for most residential outlets. Specialty wires for higher amperage circuits (e.g., 240V dryer or oven circuits) or outdoor-rated wiring can cost \$3–\$5 per foot. Copper vs aluminum: Copper is more expensive but preferred for reliability; aluminum is cheaper but less common for residential socket wiring. Additional Materials Connectors, fittings, and mounting hardware are typically required for safe installation and add \$10–\$50 per circuit depending on complexity. Circuit breakers for new circuits cost \$15–\$50 each, depending on amperage and type (standard or AFCI/GFCI). Labor and Installation Considerations Hiring a licensed electrician for wiring from the distribution box to outlets generally costs \$50–\$130 per hour, with total installation for a single outlet ranging \$150–\$350 including materials. For multiple outlets or a full distribution box upgrade, labor and wiring costs scale with the number of circuits and distance from the panel. Estimating Total Cost For a typical residential project with 2–4 new outlets connected to a distribution box: Wire: 50–100 feet of 12/2 wire → \$75–\$300 Connectors and hardware: \$20–\$50 Circuit breakers: \$30–\$100 Labor: \$150–\$400 Total estimated cost: \$275–\$850 depending on wire length, outlet type, and labor rates. Using these ranges, you can budget for both materials and professional installation when planning a distribution box wiring project.
